

INTRODUCING

The only dishwasher with Sub-Zero and Wolf in its DNA.

Since 1945, Sub-Zero has been making refrigerators that set new standards for freshness, durability and design. In 2000, Wolf became its kitchen companion, bringing professional level cooking performance to residential customers. Together, you'll find them in the world's finest kitchens.

Now Cove is here. It is the culmination of years of research and refinement — of studying the way we all wash our dishes, talking to consumers, and challenging ourselves to improve the dishwashing experience at every step, in every possible way.

Cove gets your dishes spotlessly clean and dry. It's built in the same USA facilities as Sub-Zero and Wolf, to last not just years, but decades.

It is the dishwasher you've been waiting for.

Clean with **absolute confidence.**

Cove dishwashers clean to a higher standard. They're built to ensure that each dish and utensil – including heavy saucepans, wire whisks and even delicate china dishes – emerges from the dishwasher spotlessly clean and dry. With a vast array of custom wash and dry combinations, Cove offers a clean beyond anything you've ever seen.

CUSTOMIZE YOUR CLEAN

Whatever you like to cook, Cove gets dishes clean. Set it on Automatic and forget it, or use specialty settings like Pots/Pans, Crystal/China or many more.

ADJUSTABLE TINES AND RACKS

Wherever you see green inside a Cove, you can adjust tines to cradle delicate dishware, or tilt the middle rack to hold taller tumblers above and fit tall pans or trays below.

NOT JUST CLEAN – SANITIZED

Do you have baby bottles, pacifiers, canning jars, even cutting boards? Cove sanitizes them with its Sani Rinse option.

FAN-ASSISTED DRYING

Cove gets your dishes and utensils dry, with no need to towel dry after the cycle is complete.

UTENSIL RACK

Third row utensil rack organizes and cleans silverware completely, because utensils don't overlap. A bottom basket holds larger utensils.

FOUR-STAGE FILTRATION

Cove's innovative filter design catches food particles to ensure clean water is passed through the jets during washing and rinsing.

Designed to complete your kitchen beautifully.

Why do designers love Sub-Zero and Wolf appliances? Because they integrate so beautifully into any kitchen design, opening up endless new possibilities. Now Cove is here, with that design flexibility and streamlined style. Cove is installed flush to surrounding cabinetry with hidden controls and can be fitted with stainless steel or custom panels to blend seamlessly into any kitchen design, and of course, coordinate perfectly with its Sub-Zero and Wolf kitchen companions.

MANY PANEL OPTIONS

Choose the classic stainless steel panel accessory in a 60 CM width or apply a custom panel to match your cabinetry for 24" and 60 CM widths.

MATCHING HANDLES AVAILABLE

Choose tubular or pro handle options from the Sub-Zero and Wolf line, or a custom handle that matches your cabinetry.

SOLID DOOR CONSTRUCTION

The look is clean and sophisticated, with no visible screws or controls.

TOE KICK FLEXIBILITY AND TIGHT 1/8" REVEAL

Talk to your designer about these points — just two more ways Cove gives you a completely integrated look.

FLUSH INSET INSTALLATION

Your Factory Certified Installer will make sure your Cove dishwasher is perfectly flush with your cabinetry.

Is this the first **20-year dishwasher?**

The average dishwasher lasts about ten years. Ten years from now, Cove will just be getting warmed up. It's built in the same state-of-the-art USA facilities as Sub-Zero and Wolf, of the same premium-grade materials, then put through a rigorous testing process. We test key components individually and put every assembled unit through functional testing that's far more punishing than anything the average consumer will ever subject the dishwasher to. We're confident Cove will never let you down.

FULL 5-YEAR WARRANTY

Cove comes with a full 5-year warranty on all parts and service — and our unrivaled 24/7 customer assistance for the life of the product.

PREMIUM CONSTRUCTION

Like its Sub-Zero and Wolf counterparts, Cove is made in our own USA facilities with stainless steel interior, powerful brushless DC motor, leak protection system and much more.

RIGOROUS TESTING

100% factory testing means key parts are tested before assembly and finished units are put through additional testing to ensure Cove performs to very strict standards.

FACTORY CERTIFIED SERVICE

We're confident that Cove will give you maintenance-free performance. But if it should ever need service, our factory-certified technicians will deliver true "white glove" service and use only genuine Cove parts.

Keep the conversation flowing.

Cove is so quiet, it will never interrupt a kitchen conversation. An Extra Quiet cleaning mode passes even the fussiest sleeping baby test. But quiet operation is just one of the features that makes Cove a pleasure to own and operate. Bright interior lighting, easy-to-use controls — we've built in numerous thoughtful features.

FLOOR
STATUS
LIGHT

NEAR-SILENT OPERATION

Whether you're conversing with guests or helping your children with their homework, Cove will never interfere with tranquil, near-silent operation.

INCREASED INTERIOR VISIBILITY

Loading and locating dishes is so much easier with Cove's bright interior, and the LED lighting is both longlasting and energy-efficient.

BLENDS IN SEAMLESSLY

Cove's controls are hidden under the countertop, and a status light shines down on the floor to keep a clean, streamlined look.

CUSTOM SETTINGS

User-friendly touch controls allow you to easily program your Cove to wash dishes your way — on Normal or Automatic for day-to-day operation, or specialty cycles for more delicate or heavily soiled dishes.

IT'S AN OPEN AND SHUT CASE:
Cove gets dishes cleaner.
